## 1.0 Summary

### Royal Park Redevelopment Tract Moore, Oklahoma

**Current Property Owner: Royalpark-Moore**  
**35.324125°N, -97.498858°W**

Date Phase I Property Reconnaissance Conducted: December 3, 2014  
Date of report: December 17, 2014

Type of report: Phase I Environmental Site Assessment  
Conducted in general accordance with ASTM E 1527-13

Company report is for: City of Moore

Report by: Lochner

#### Property description

- The Property is comprised predominantly of vacant land with mobile home pad infrastructure and three buildings remaining on the Property;
- Sewer, water, fiberoptic cable, and electric utilities are known to service the Property;
- The Property is comprised of a single legal description;
- The Property is comprised of 14.44 acres of land;
- The Property is gently sloping with lower elevations generally to the east;
- The Property elevation is approximately 1,205 to 1,225 feet above mean sea level (MSL);
- The eastern-most portion of the Property, adjacent to the intermittent tributary to Little River, is located in the 100-year flood zone;
- The Property's geology consists of formations of the Upper part of the Leonardian Series, a stratified sequence from the Paleozoic era;
- Soils on the Property are comprised of Renfrow silt loam, which are characterized as being clayey, with a high water table, and having very slow infiltration rates;
- Historical sources indicate the Property was initially developed as a mobile home park in the early 1970s. The mobile home park remained in operation until early 2014, when it was vacated due to tornado damage. To date, the Property is predominantly vacant, with mobile home pad infrastructure remaining in place and three buildings remaining on the Property.
- The majority of the Property was originally platted as 'Royalpark-Moore.' However, over time, the Property became more commonly known as 'Royal Park.' For the purposes of this report, the Property is referred to as the 'Royal Park Redevelopment Tract,' or 'Property.'

#### Current uses of adjoining properties

- North: Residential property
- East: Residential property
- South: Under construction
- West: Under construction

Current well records

- Oklahoma Water Resource Board (OWRB) records indicate there are two registered groundwater wells owned by the City of Moore within 0.25 mile of the Property; one well is located near SW 14th Street and Telephone Road and the other is located near SW 11th Street and Eagle Drive. The database also lists 22 monitoring wells as being located near SW 17th Street and Telephone Road, the former Jack Masters Inc. LUST site location (presently NYU Shop) at 1717 Telephone Road;
- The Oklahoma Corporation Commission (OCC) Well Database indicates one oil well was located approximately 0.15 mile southwest of the Property;
- Historic topographic maps indicate that there were no oil and gas wells, gravel pits, or mining activities on the Property.

Report Database Records

- The Property was not identified on any of the searched federal, state or local regulatory agency databases;
- Two LUST/UST/HIST UST sites, two EDR US HIST CLEANERS sites, and two EDR US HIST AUTO STATIONS site are located within the respective ASTM E 1527-13 search radii. These sites do not appear to present potential environmental threats to the Property.

Recognized Environmental Conditions (RECs)

- This assessment has indicated that a potential REC exists on the Property in that the May 2013 tornado potentially scattered asbestos-containing materials and lead-based paint debris throughout the Property. Additionally, based upon the reported construction date of the remaining buildings, and the prevalence of asbestos within building materials of those time periods, the structure may contains at least limited quantities of asbestos-containing materials.

Report Recommendations and Conclusions

- Soil sampling is recommended on the Property prior to redevelopment to assess the potential of asbestos-containing materials or lead-based paint in surface soils. Additionally, an asbestos-containing materials survey is recommended for the remaining buildings prior to renovation or demolition.

## 2.0 Introduction

### 2.1 Purpose

The purpose of this Phase I ESA was to identify Recognized Environmental Conditions (RECs) associated with the current and historic usage of the Property and adjoining properties, nearby off-property sources of potential impact, and the potential environmental impact on the Property from surrounding conditions or activities. A Phase I ESA is a service of which basic elements are determined by the standard of care prevailing at the time the service was rendered in the area where it was rendered. Because standards of care can be identified only through retrospective inquiry, Lochner has completed this study in general accordance with American Society of Testing and Materials (ASTM) Standard E1527-13. By definition, such standards set forth are minimum requirements.

Lochner also performed this Phase I ESA to satisfy requirements to qualify for the innocent landowner defense described in the Comprehensive Environmental Response Compensation and Liability Act (CERCLA liability) as codified by the United States Environmental Protection Agency (EPA) "Standards and Practices for All Appropriate Inquiries," 40 CFR Part 312 in November 2005. The Property was assessed using reasonably ascertainable records to the Property's first developed use or back to 1940, whichever is earlier. This Phase I ESA is not a comprehensive evaluation of business risks nor is it an environmental compliance audit.

As defined by the ASTM, the term "RECs" is defined as the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, groundwater, or surface water of a property. The term is not intended to include *de minimis* conditions that generally do not present a material risk of harm to public health or the environment, and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis* are not RECs.

The identification of recognized environmental conditions in connection with the subject property may impose an environmental liability on owners or operators of the site, reduce the value of the site, or restrict the use or marketability of the site, and therefore, further investigation may be warranted to evaluate the scope and extent of potential environmental liabilities.

### 2.2 Scope of Service

The City of Moore, Oklahoma (City) contracted with H.W. Lochner (Lochner) to conduct a Phase I Environmental Site Assessment (ESA) for the property described as the Royal Park Redevelopment Tract in Moore, Oklahoma. According to the Cleveland County Assessor, the Property is currently comprised of one legal description; a boundary survey provided by the City of Moore indicates the Property is comprised of 14.4 acres located in the southeast quarter of Section 22, Township 10 North, Range 3 West of Cleveland County, Oklahoma. The boundary survey has been included in **Appendix A**.

### 2.3 Significant Assumptions

While this report provides an overview of potential environmental concerns, both past and present, the Phase I ESA is limited by the availability of information at the time of the assessment. It is possible that unreported disposal of waste or illegal activities impairing the environmental status of the Property may have occurred which could not be identified. The conclusions and recommendations regarding environmental conditions that are presented in this report are based on a scope of work authorized by the City.

### 2.4 Limitations and Exceptions of this Phase I ESA

It should be noted that this assessment did not include a review or audit of operational environmental compliance issues, or of any environmental management systems (EMS) that may exist on the Property. Where

required, the documents listed in Appendices A through E were used as reference material for the completion of the Phase I ESA. Some of the information presented in this report was provided through existing documents and interviews. Although attempts were made, whenever possible, to obtain a minimum of two confirmatory sources of information, Lochner in certain instances has been required to assume that the information provided is accurate.

Should additional information become available which differs significantly from our understanding of conditions presented in this report, we request that this information be brought to our attention so that we may reassess the conclusions provided herein.

Problems have arisen in the past because people and organizations have assumed, improperly, that they could rely on a Phase I ESA report developed for another party. The City is the only intended beneficiary of this report. The City is the only party to which Lochner has explained the risks involved and has been involved in the shaping of the scope of services needed to satisfactorily manage these risks, if any, from the City's point of view. Accordingly, reliance on this report by any other party may involve assumptions whose extent and nature lead to a distorted meaning and impact the findings and opinions related herein. Reliance on this report would in turn result in misinterpretation of these findings and opinions, and potentially unwise actions based on those misinterpretations.

The opinions relative to hazardous substances and petroleum products given in this report are based on information derived from property reconnaissance and from other activities described herein. This report has been prepared without performing full reconnaissance activities. The City is advised that the conditions observed by Lochner are subject to change. It is possible that certain indicators of the presence of hazardous substances and petroleum products may have been latent at the time of the most recent property reconnaissance and may subsequently have become observable. Therefore, the formulation of Lochner's findings and opinions are based solely on the information available.

## **2.5 Special Terms, Limiting Conditions, and Methodology Used**

Authorization to perform this assessment was given by the City on November 25, 2014. Instructions as to the location of the property, access, and an explanation of the property and facilities to be assessed were provided by the City and by the current property owner.

This ESA has been performed in conformance with ASTM E1527-13, "Standard Practice Environmental Site Assessments: Phase I Environmental Site Assessment Process." The four main components of the study performed by Lochner are as follows:

- 1) Conducted a visual property reconnaissance of the Property including walking the exterior of the Property to identify evidence of past and present potential environmental conditions;
- 2) Performed a records review including obtaining a report from Environmental Data Resources, Inc. (EDR) for State and Federal agency records of hazardous material, hazardous waste, landfill locations, and areas of environmental concern at the properties or at adjacent properties. The search included records required by the standard practice;
- 3) Interviewed current or past owners, operators, or occupants of the Property as feasible for information regarding uses of the Property and potential environmental conditions associated with the Property. In addition, interviews were conducted with relevant local government officials, and
- 4) Prepared a final report to present an evaluation of the Property.

This ESA did not include any inquiry with respect to radon, methane, lead in drinking water, formaldehyde, endangered species, microbial growth, lead-based paint, asbestos-containing materials, or other services or potential conditions or features not specifically identified and discussed herein.

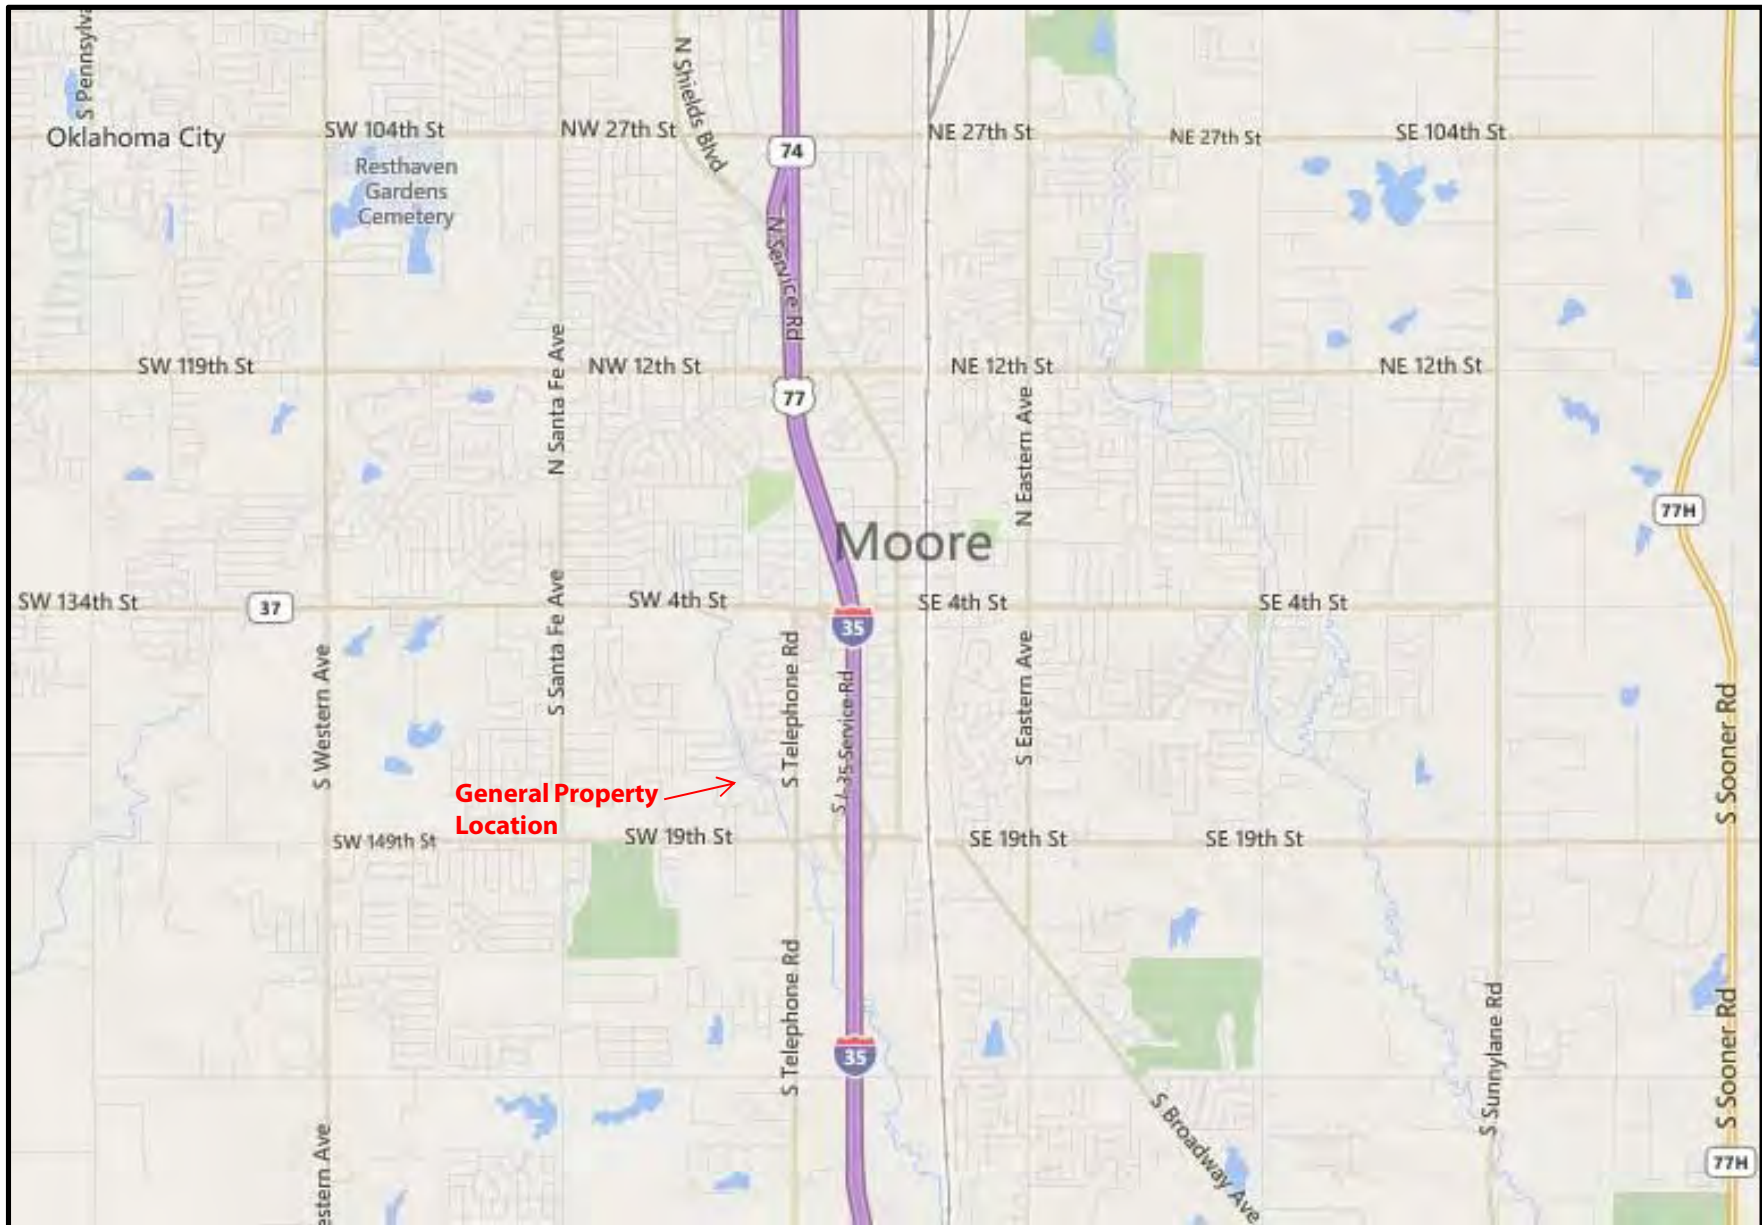

It should be noted that a chain-of-title search was not conducted. However, reasonably ascertainable Recorded Land Title Records were searched to obtain current ownership for the parcels at the Property. As specified in ASTM E1527-13, Section 8.3.4.4, the record review was conducted to obtain "helpful information about uses of the property," and was evaluated in conjunction with other historical sources to assess the past and present uses of the Property.

Any discussion of subsurface conditions or apparent shallow groundwater flow is based on the assumption that shallow groundwater flow generally follows topographic surface gradients. However, actual groundwater flow direction may be affected by local factors including but not limited to: soils, bedrock depth and composition, seasonal precipitation, fractures, solution cavities, confining layers, groundwater wells, and utility trenches.

## **2.6 User Reliance**

This report represents Lochner's service to the City as of the report date. In that regard, the report constitutes Lochner's final document, and the text of the report may not be altered in any manner after final issuance of the same. Opinions relative to environmental conditions given in this report are based upon information derived from the property reconnaissance date and from other activities described herein. Specifically, Lochner does not and cannot represent that the Property contains no hazardous or toxic materials, products, or other latent conditions beyond that observed by Lochner during its property assessment.

The findings and opinions conveyed via this ESA report are based upon information obtained at a particular date from a variety of sources enumerated herein, which Lochner believes are reliable. Nonetheless, Lochner cannot and does not warrant the authenticity or reliability of the information sources it has relied upon. The Phase I ESA was limited by the accuracy of the environmental databases provided by Environmental Data Resources, Inc.

**3.0 Property Description**

**3.1 Location and Legal Description**

The Property consists of a single legal description and lies within the southeast quarter of Section 22, Township 10 North, Range 3 West of Cleveland County, Oklahoma. A boundary survey, legal description, and County Assessor information for the Property can be viewed in **Appendix A** of this document.

**3.2 Property and Vicinity General Characteristics**

The Property is currently comprised of pads and infrastructure that formerly serviced a mobile home park. Three buildings presently occupy the Property. The Property is located in an area that was previously comprised of single-family homes and mobile homes, but is now predominantly vacant and being redeveloped.

**3.3 Current Uses of the Property**

The Property is currently being maintained as vacant property. Three buildings formerly associated with mobile home park operations remain on the Property, but are no longer being utilized.

**3.4 Description of Structures, Roads, Other Improvements on the Property**

The Property is comprised of mobile home pads that are serviced by South Janeway Avenue, Southwest 13<sup>th</sup> Street, Southwest 14<sup>th</sup> Street, and Yule Drive. The mobile home pads include electrical hookups, sewer line hook ups, water service, and for some pads, natural gas hookups.

The city blocks surrounding the Property currently consist primarily of lots that were formerly used for residential use, but are now vacant and being redeveloped. The following table summarizes current uses of adjoining properties:

<b>Direction from Property</b>	<b>Current Use</b>
North	Residential
East	Residential
South	Vacant/undergoing redevelopment
West	Vacant/undergoing redevelopment

Additional detailed information regarding historical property use of adjoining properties is presented in **Section 5.0 – Records Review**.

## **4.0 User-Provided Information**

### **4.1 Title Records**

Title records specific to the Property were not obtained. Lochner reviewed public records in the Cleveland County Assessor database to obtain current ownership information for the Property. A copy of the Assessor Property Display and plat records are available in **Appendix A**.

### **4.2 Environmental Liens or Activity and Use Limitations (AULs)**

The City is not aware of environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law. The City and current property owner were not aware of any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry.

### **4.3 Specialized Knowledge**

The City does not have any specialized knowledge or experience related to the property or nearby properties.

### **4.4 Commonly Known or Reasonable Ascertainable Information**

The City does not know of any specific chemicals that were previously present at the Property. The City does not know of any spills or other chemical releases or environmental cleanups that have taken place at the Property.

### **4.5 Valuation Reduction for Environmental Issues**

The City is unaware of any environmental issue specific to the Property that would be cause for value reduction.

### **4.6 Owner, Property Manager, and Occupant Information**

The Property is currently owned by Royalpark-Moore, represented by Ms. Pat Broadfoot.

### **4.7 Reason for Performing Phase I**

The Phase I ESA was prepared by Lochner at the request of the City.

**5.0 Records Review**

Lochner obtained and reviewed environmental and physical setting records and historic information in an effort to identify RECs in connection with the Property. The following subsections are narrative descriptions of the records Lochner obtained and reviewed.

**5.1 Standard Environmental Record Sources**

Lochner contracted Environmental Data Resources, Inc. (EDR) to conduct a search of Federal and State databases containing known and suspected sites of environmental contamination. The number of listed sites identified within the approximate minimum search distance (AMSD) from the Federal and State environmental records database listings specified in ASTM Standard E 1527-13 are summarized in the following table. Detailed information for sites identified within the AMSDs is provided below, along with an opinion about the significance of the listing to the analysis of recognized environmental conditions in connection with the subject property. Copies of the EDR research data and a description of the databases are included in **Appendix B** of this report.

The database search identified two Orphan Sites with insufficient street information to locate them with respect to the Property in the content of the EDR Report. The Orphan Sites were reviewed by Lochner with respect to the ASTM required distance specified for the particular database the Orphan Site is listed within. Neither of the records of environmental concern was within the ASTM-required distance of the Property.

**5.1.1 Federal Standard Environmental Record Sources**

Table 5.1 contains ASTM Federal Standard Databases as reported by EDR.

<b>Table 5.1 - ASTM Federal Standard Database Search Distances</b>		
<b>Database Name</b>	<b>Distance (miles)</b>	<b># of Sites Found</b>
National Priority List (NPL)	1.000	0

US Engineering Controls (US ENG CONTROLS)	0.500	0
US Institutional Controls (US INST CONTROL)	0.500	0
Emergency Response Notification System (ERNS)	TP	0

No Federal database records were found to be within the ASTM-specified search distances.

**5.1.2 State Standard Environmental Record Sources**

Table 5.2 contains ASTM State Standard Databases as reported by EDR.

<b>Table 5.2 – ASTM State Standard Database Search Distances</b>		
<b>Database Name</b>	<b>Distance (miles)</b>	<b># of Sites Found</b>
Voluntary Cleanup and Superfund Site Status Report (SHWS)	1.000	0
Permitted Solid Waste Disposal and Processing Facilities (SWF/LF)	0.500	0
Leaking Underground Storage Tank List (LUST)	0.500	2
Leaking Aboveground Storage Tank List (LAST)	0.500	0
Underground Storage Tank List, (UST)	0.250	2
Aboveground Storage Tanks (AST)	0.250	0
Institutional Control Sites (INST CONTROL)	0.500	0
State Voluntary Cleanup Program (VCP)	0.500	0
Brownfields Databases	0.500	0

Detailed below are sites listed in the above records review:

- NYU Shop (1717 Telephone Road; LUST, UST, HIST UST, AST) is located approximately 0.10 mile east/southeast and topographically upgradient relative to the Property. The LUST database indicates a suspicion of release occurred at the site in July 1997; the case was closed in September 1997 after the suspected leaking tank was found to not be leaking. A confirmed release occurred in July 1993; Oklahoma Corporation Commission (OCC) records indicate the case was closed in December 2000. OCC

records also show that 18 monitoring wells were placed in the vicinity of the leaking tank onsite, and that free product was removed. Groundwater flow direction was stated to be to the south/southwest in the site’s Oklahoma Risk-Based Corrective Action (ORBCA) plan. The UST database indicates one 10,000-gallon tank and one 6,000-gallon tank are currently in use at the site. The HIST UST database indicates these two tanks were installed in 1988. Based on the closure of the LUST case and reported groundwater flow direction, this site is not expected to present an environmental concern to the Property.

- Murphy USA #6530 (505 SW 19<sup>th</sup> Street; LUST, UST, HIST UST) is located approximately 0.30 southeast and topographically downgradient relative to the Property. The LUST database indicates a confirmed release occurred in May 2000. The OCC closed the LUST case in November 2000. The site’s ORBCA indicated contaminants of concern at the site did not pose a risk to human health, safety, or the environment. The UST database lists one 15,000 gallon and one 10,000-gallon UST as currently in use. Both tanks were installed in 1997. Based on the regulatory closure of the LUST case and the downgradient position relative to the Property, this site is not expected to present an environmental risk to the Property.

Table 5.3 contains additional Federal and State databases as reported by EDR. These records are not required to be reviewed according to ASTM E1527-13.

EDR US Historical Cleaners	0.250	2

The following database records were identified:

- 750 SW 14<sup>th</sup> Street (750 SW 14<sup>th</sup> Street; EDR US HIST CLEANERS) is located approximately 0.10 mile west and topographically upgradient of the Property. The site is listed as being ‘Maestro Carpet Cleaning’; however, a residential dwelling was located at the site in 2008. No violations are listed for this site. Due to the distance of this site from the Property and its residential use, this site is not expected to present an environmental threat to the Property.
- 1809 S Telephone Road (1809 S Telephone Road; EDR US HIST CLEANERS) is located approximately 0.10 mile southeast and topographically crossgradient from the Property. The site is listed as being ‘Dry Clean Super Center’ in 2011 and 2012. Although the site is topographically crossgradient of the Property, a creek runs north-south between the two properties. No violations are listed for this site. Based on the distance of this site from the Property, this site is not expected to pose an environmental risk to the Property.
- 1717 S Telephone Road (1717 S Telephone Road; EDR US HIST AUTO STATIONS) is located approximately 0.10 mile east and topographically upgradient relative to the Property. The site is listed as being ‘Texaco Food Mart’ from at least 2005 until 2009. This site is also listed in Section 5.1.2 as a LUST case. Based on the regulatory closure of the LUST case, this site is not anticipated to pose an environmental threat to the Property.
- 1817 S Telephone Road (1817 S Telephone Road; EDR US HIST AUTO STATIONS) is located approximately 0.11 mile southeast of the southeastern corner of the Property and topographically downgradient relative to the Property. The Property is listed as ‘Kwik Kar Lube & Tube’ from at least 2004 to 2010. No violations are listed for the site. There was no information reviewed that suggests that this site could present an environmental risk to the Property.

### 5.3 Physical Setting Sources and Information

#### 5.3.1 Topography

The 1995 7.5-Minute United States Geological Survey (USGS) Topographic Quadrangle Map of the Moore Quadrangle indicates the Property slopes to the east, toward a first-order unnamed intermittent tributary to Little River. The tributary is located east adjacent to the Property. The elevation of the Property is approximately 1,205 to 1,225 feet above mean sea level. Refer to Figure 2.3 for the Property topographic map.

#### 5.3.2 Soil Conditions

According to the information supplied to EDR from the US Department of Agriculture's (USDA) Soil Conservation Service (SCS), the Property is primarily classified as Renfrow silt loam. These soils are characterized as being clayey, with a high water table, and having very slow infiltration rates.

#### 5.3.3 Local and Property Geology

According to the USGS Digital Data Series – 11 (1994), the Property's geology consists of the Upper part of the Leonardian Series, a stratified sequence from the Paleozoic era.

#### 5.3.4 Regional and Local Groundwater Conditions

The Property is located above the Garber Wellington, a major aquifer system. The Oklahoma Water Resources Board Water (OWRB) Information Mapping System well information indicates there are no wells located on the Property. There are two registered groundwater wells owned by the City of Moore within 0.25 mile of the Property: one well is located near SW 14<sup>th</sup> Street and Telephone Road and the other is located near SW 11<sup>th</sup> Street and Eagle Drive. The database also lists 22 monitoring wells as being located near SW 17<sup>th</sup> Street and Telephone Road, the former Jack Masters Inc. LUST site location (presently NYU Shop) at 1717 Telephone Road. The monitoring wells range in depth from 7 to 40 feet below ground surface, and were installed from 1993 to 1995.

Lochner also searched the Oklahoma Corporation Commission (OCC) Oil and Gas Well Database to view information on any oil and gas wells currently or historically located on the Property. No oil and gas wells were found to be located in the same quarter-quarter section as the Property. The nearest oil well was found to be approximately 0.15 mile southwest of the Property. The well was constructed in 1957 and plugged in 1958. This well is not expected to have presented an environmental risk to the Property.

### 5.4 Historical Use Information on the Property

Lochner reviewed reasonably ascertainable and practically reviewable historical information concerning the Property and adjoining properties. The potential sources of historical information that were investigated by Lochner included the following:

- Aerial Photographs
- Fire Insurance Maps
- Flood Plains
- Zoning and Land Use Records
- Fire Department Records
- Select Recorded Land Title Records
- Historic Topographic Maps
- Local Street Directories
- Environmental Liens
- City Building Records

#### 5.4.1 Aerial Photographs

Lochner obtained and reviewed aerial photographs from 1951, 1969, 1975, 1979, 1981, 1984, 1995, 2005, 2006, 2008, and 2010 to obtain information about the history of development on the Property. Additional aerial

photographs for 2002, 2013, and 2014 were utilized to assess the Property via Google Earth. Aerial photographs are presented in **Appendix C**. The observations noted during the review are summarized in the paragraphs below.

**Property:**

- 1951: The Property appears to be comprised of vacant, agricultural land.
- 1969: The Property is under construction as what appears to be a mobile home park.
- 1975-2010: The Property appears to be fully developed as a mobile home park.
- 2013: Debris from the tornado that impacted northern adjoining properties appears to be scattered throughout the Property.
- 2014: The majority of the mobile home pads appear to be vacant. Some mobile homes remain on the Property.

**5.4.2 Fire Insurance Maps**

In the late nineteenth century, the Sanborn Company began preparing maps for use by fire insurance companies. These maps indicate construction materials for specific structures and the presence of flammable materials. These maps were updated and expanded geographically at various periods during the twentieth century. No Sanborn® maps are available for the Property.

**5.4.3 Flood Plains**

Currently, the Federal Emergency Management Agency (FEMA) identifies the Property as being located on "40027C0180J" revised February 20, 2013. The Property is located in an area that is generally outside the 100-year flood zone; however, the eastern boundary of the Property that abuts the intermittent tributary to Little River, which is located within the 100-year flood zone.

**5.4.4 Zoning/Land Use Records**

According to the City of Moore, the Property is zoned "R3," a designation indicating the land is suitable for high-density residential usage.

**5.4.5 Fire Department Records**

Fire Marshal Jeff Lindsay of the Moore Fire Department was contacted regarding response records to the Property as a result of a reported release of petroleum products, chemicals, hazardous substances or wastes, UST records and other known responses to environmental emergencies on the Property. No records were identified for the Property. Additionally, Mr. Lindsay was not aware of any ASTs or USTs historically being located on the Property, nor was he aware of any historic environmental spills.

**5.4.6 Recorded Land Title Records**

Lochner reviewed public records on the Cleveland County Assessor Website to obtain current ownership information for the Property. The Property is currently owned by Royalpark-Moore, represented by Ms. Pat Broadfoot. A copy of the Cleveland County Assessor's tax roll information is available for the mobile homes located on the Property is included in **Appendix A**.

**5.4.7 Historic Topographic Maps**

Lochner reviewed historic topographic maps for the years 1892, 1938, 1956, 1969, 1975, 1986, and 1995. The 1892 and 1938 maps were produced at a scale of 1:62,500 and do not include sufficient details to indicate specific usage of the Property or adjoining parcels. The remaining topographic maps were produced at a scale of 1: 24,000 and show defined street boundaries and topographic elevations. The Property is depicted as being undeveloped on the 1956 map. The 1969 and 1975 maps show the Property as being in the beginning phases of construction. The 1986 and 1995 maps indicate the Property as 'Trailer Park.' Historic topographic maps are provided in **Appendix D**.

#### 5.4.8 Local Street Directories

Polk City Directories include listings of residents, businesses and professional concerns organized both alphabetically by name similar to a telephone book, and alphanumerically by street name then specifically by street address. Directories used in this study were made available through EDR and included research for listings from 1940, 1942, 1948, 1952, 1961, 1964, 1968, 1973, 1978, 1983, 1989, 1992, 1995, 1999, 2003, 2008, and 2013. However, the research only indicated that records existed for the Property from 1995 to 2013.

Reasonably available listings for the Property and adjoining properties were reviewed at periodic intervals. Listings were reviewed to identify names of facilities suggesting use, generation, storage, treatment or disposal of potentially hazardous materials or petroleum products.

Listings for the Property are comprised of residential addresses for the years 1995 through 2013.

#### 5.4.9 Environmental Liens

The current property owner is not aware of and current or historic environmental cleanup liens against the property that were filed or recorded under federal, tribal, state, or local law.

#### 5.4.10 City Building Records

Building records were not available for the Property. However, the original plats are available in **Appendix A**.

#### 5.4.9 Property Historical Use Summary

Historical sources indicate the Property was initially developed as a mobile home park in the late 1960s. Development of the mobile home park continued in the early 1970s. The mobile home park remained in operation until early 2014, when it was vacated due to tornado damage. To date, the Property is predominantly vacant, with mobile home pad infrastructure in place and three administrative buildings remaining on the Property.

### 5.5 Historical Use Information on Adjoining Properties

#### 5.5.1 Aerial Photographs

The observations for adjoining properties noted during the review are summarized in the paragraphs below.

##### North:

- 1951: Land to the north and northeast of the Property appears to be comprised of agricultural land. A stream runs along the eastern boundary of the Property.
- 1969-1981: Land to the north of the Property appears to be comprised riparian land or a park. The stream to the east/northeast of the Property appears to have been channelized; residential development appears to be located east of the channelized stream.
- 1984-2010: Land to the north and northeast of the Property appears to be utilized as a residential neighborhood.
- 2013: Land to the north and northwest appears to have been located in the path of the May 2013 tornado. Debris is scattered in a clear path north and northeast of the Property.
- 2014: Several residential properties to the north and northeast appear to be in various stages of being cleared or being rebuilt as residential structures.

##### East:

- 1951: Land to the east of the Property appears to be comprised of agricultural land and a stream. Land to the southeast of the Property appears to be comprised of agricultural land.

- 1969-1995: Land to the east and southeast of the Property appears to be comprised of a channelized stream and a residential neighborhood. Land to the southeast of the Property appears to remain undeveloped.
- 2002-2010: Land east and northeast of the channelized stream appears to be comprised of residential dwellings, except what appears to be a storage facility east of the Property along Telephone Road.
- 2013: Same as in previous years, except debris from the May 2013 tornado is evident in the yards of the residential properties to the east and southeast.
- 2014: The properties to the east appear to be comprised of residential dwellings; properties to the southeast appear to be comprised of commercial buildings.

**South:**

- 1951: Land to the south, southeast, and southwest of the Property appears to be comprised of agricultural land.
- 1969-1995: The south adjoining property appears to be utilized as high-density residential property. The frontage abutting SW 19<sup>th</sup> Street appears to be vacant.
- 2002: The south adjoining property appears to be utilized as high-density residential property. The frontage abutting SW 19<sup>th</sup> Street appears to be vacant. A commercial building appears to be present southeast of the Property, near the intersection of SW 19<sup>th</sup> Street and Telephone Road.
- 2005-2006: Same as in 2002, except additional commercial buildings appear to be located southeast of the Property, near the intersection of SW 19<sup>th</sup> Street and Telephone Road.
- 2008: Land to the south of the Property appears to be comprised of high-density residential property; land to the southeast of the Property appears to have been fully-developed with commercial buildings.
- 2010: Same as in 2008, except additional commercial buildings appear to be present south of the Property, along SW 19<sup>th</sup> Street.
- 2013: Same as in 2010, except debris from the May 2013 tornado appears to be scattered among the properties to the south, southeast, and southwest.
- 2014: Properties to the south appear to be comprised of high-density residential property, although several mobile home pads appear to be vacant. Land abutting SW 19<sup>th</sup> Street appears to be comprised of numerous commercial buildings. Land to the southwest of the Property appears to be used for agricultural purposes.

**West:**

- 1951-1969: Land to the west and northwest of the Property appears to be comprised of agricultural land.
- 1975: Land to the west of the Property appears to have been developed for high-density residential use. Land to the southwest and northwest appears to be comprised of agricultural land.
- 1979-2010: Same as in 1975, except residential dwellings appear to be present to the northwest of the Property.
- 2013: Properties to the southwest and to the west appear to have been impacted by the May 2013 tornado. Debris appears to be scattered in a path to the northeast.
- 2014: The residential properties to the west of the Property appear to have been cleared. Residential properties to the northwest of the Property appear to be in various stages of being rebuilt.

**5.5.2 Fire Insurance Maps**

No Sanborn Fire Insurance Maps were available for the adjoining properties.

### 5.5.3 Flood Plains

Currently, the Federal Emergency Management Agency (FEMA) identifies the adjoining properties as being located on ""40027C0180J" revised February 20, 2013. The adjoining properties to the east, particularly areas along the intermittent tributary to Little River, are located within the 100-year flood zone.

### 5.5.4 Zoning/Land Use Records

According to the City of Moore, the northern, eastern, and western adjoining properties are currently zoned "R2," a zoning designation reserved for parcels dedicated for medium-density residential land use. Properties to the south are zoned "R3" and "C3." These properties are suitable for high-density residential use and medium commercial use.

### 5.5.5 Fire Department Records

The Moore Fire Department was contacted regarding UST records and other known responses to environmental emergencies on the adjoining properties. No records were identified for adjoining properties.

### 5.5.6 Recorded Land Title Records

Lochner reviewed public records from the Cleveland County Assessor to ascertain current property use information for adjoining properties. The adjoining properties appear to have been historically utilized for residential purposes.

### 5.5.7 Historic Topographic Maps

Lochner reviewed historic topographic maps for the years 1892, 1938, 1956, 1969, 1975, 1986, and 1995. The 1892 and 1938 maps were produced at a scale of 1:62,500 and do not include sufficient details to indicate specific usage of the Property or adjoining parcels. The remaining topographic maps were produced at a scale of 1: 24,000 and show defined street boundaries and topographic elevations. Historic topographic maps are provided in **Appendix D**.

The 1956 topographic map indicates land in the vicinity of the Property is undeveloped. By 1969, the properties to the south and to the east of the Property appear to have been developed. The properties approximately one mile south of the Property are denoted as the 'South Moore Oil Field.' Further development of the adjoining properties is evident on the 1975, 1986, and 1995 maps. The intermittent tributary to Little River is denoted east of the Property.

### 5.5.8 Local Street Directories

Reasonably available listings for adjoining properties were reviewed at periodic intervals. Listings were reviewed to identify names of facilities suggesting use, generation, storage, treatment or disposal of potentially hazardous materials or petroleum products. Directories used in this study were made available through EDR and included research for listings from 1940, 1942, 1948, 1952, 1961, 1964, 1968, 1973, 1978, 1983, 1989, 1992, 1995, 1999, 2003, 2008, and 2013. However, the research only indicated that records existed for the Property from 1995 to 2013.

None of the City Directory Listings reviewed indicated a property of environmental concern within a one-block radius of the Property.

### 5.5.9 Adjoining Properties Historical Use Summary

The Property is located in an area that was utilized as agricultural land from at least the early 1950s through the 1960s. In the 1960s, land to the east and south of the Property began to be developed for residential purposes. This development continued throughout the 1970s, and by the 1980s, all adjoining properties were comprised of residential structures except the land to the southwest of the Property. Commercial buildings were constructed south and southeast of the Property, along SW 19<sup>th</sup> Street and Telephone Road, in the 1990s and 2000s. In May 2013, an EF-5 tornado caused severe damage or destroyed homes to the west, north, and

northeast of the Property. The homes to the west of the Property were cleared in 2014; homes to the north and northeast were rebuilt as residential structures. At the time of this report, land to the west and southwest was under construction as an apartment complex and a commercial building.

## 6.0 Property Reconnaissance

### 6.1 Methodology

The property reconnaissance was performed on December 3, 2014. Representative photographs taken during Property reconnaissance are included within **Appendix E**.

### 6.2 General Property Setting

The Property consists of approximately 14.44 acres of land within the southeast quarter of Section 22, Township 10 North, Range 3 West of Cleveland County, Oklahoma. The Property is comprised of a single legal description and is located in Moore, Oklahoma. The Property is currently bound by residential parcels to the north and east, and by land that is being redeveloped on the south and west sides of the Property.

### 6.3 Exterior Observations

#### 6.3.1 Hazardous Substance and Petroleum Product Container Use

During the property reconnaissance, indications of commercial use, treatment, storage, disposal, and generation of hazardous substances and petroleum products were searched for on the Property. A construction staging area was observed near the southeast corner of SW 14<sup>th</sup> Street and Yule Drive. An approximately 500-gallon AST was noted at the construction staging area. The AST had a secondary containment trough; no evidence of leaks or spills was observed during the property reconnaissance. A 55-gallon drum was located near the AST at the time of the property reconnaissance, but appeared to be empty.

#### 6.3.2 Storage Tanks

Lochner looked for indications of the presence of storage tanks on the Property during the property reconnaissance. Aside from the AST observed inside the construction staging area, no evidence of a current or former storage tank was noted on the Property.

#### 6.3.3 Odors

No odors were identified on the Property at the time of the property reconnaissance.

#### 6.3.4 Pools of Liquid

No pools of liquid were identified on the Property at the time of the property reconnaissance.

#### 6.3.5 Drums

A 55-gallon drum was observed inside of a construction staging area near the southeast corner of SW 14<sup>th</sup> Street and Yule Drive. The drum appeared to be empty at the time of the property reconnaissance. No evidence of stains or spills was noted at the time of the property reconnaissance.

#### 6.3.6 Unidentified Substance Containers

No unidentified substance containers were seen on the Property at the time of the property reconnaissance.

#### 6.3.7 PCBs

No evidence of PCBs was noted on the Property at the time of the property reconnaissance.

**6.3.8 Pits, Ponds, or Lagoons**

No pits, ponds, or lagoons were identified on the Property.

**6.3.9 Stained Soil or Pavement**

No significantly stained soil or pavement was identified on the Property at the time of the reconnaissance.

**6.3.10 Stressed Vegetation**

No stressed vegetation was identified at the time of the property reconnaissance.

**6.3.11 Solid Waste**

Solid waste presenting an environmental concern was not observed on the Property at the time of the property reconnaissance. Several debris piles associated with demolition and tornado debris were observed throughout the Property at the time of the property reconnaissance. Regulated chemicals or petroleum hydrocarbons were not observed within the debris.

**6.3.12 Potable Water Supply**

Potable water is supplied to the Property by the City of Moore.

**6.3.13 Wastewater**

During the Property reconnaissance, an attempt was made to look for wastewater or other liquid (including storm water) or any discharge into a drain, ditch, or stream on or adjacent to the Property. No discharge of wastewater was observed on the Property.

**6.3.14 Wells**

Dry wells, irrigation wells, injection wells, groundwater monitoring wells, and potable wells were searched for on the Property during the property reconnaissance. No existing wells were identified on the Property.

**6.3.15 Septic Systems**

On-property septic systems or cesspools were investigated on the Property during the reconnaissance. No septic systems or cesspools were found during the property reconnaissance.

**6.3.16 Adjoining Property Observations**

The following observations were noted regarding the adjoining properties:

North: Residential property  
East: Residential property  
South: Currently being redeveloped  
West: Currently being redeveloped.

## 7.0 Interviews

Lochner interviewed Mr. Stan Drake, Assistant City Manager, and Ms. Pat Broadfoot, current property owner, with regard to current and historic environmental concerns of the Property.

### 7.1 Interview with Mr. Stan Drake, Assistant City Manager

Mr. Stan Drake, Assistant City Manager, was interviewed because of his tenure with the City and familiarity with the Property for over 40 years. Mr. Drake indicated that the Property had originally been utilized for agricultural land, until it was developed as a mobile home park. Mr. Drake was not aware of any environmental concerns being present on the Property, nor was he aware of any contaminated sites nearby that had impacted the Property. Mr. Drake did not believe that any ASTs or USTs had historically been located on the Property, although he mentioned a pumpjack may have been on the Property prior to its development as a mobile home park. Mr. Drake stated that he was not aware of any current or historic environmental liens on the Property. Mr. Drake indicated that the Property would likely be redeveloped by the City as a housing development, and that fill would be brought in from a City Park located north of the Property for site development purposes.

### 7.2 Interview with Ms. Pat Broadfoot, Current Property Owner

Ms. Pat Broadfoot, current property owner, was interviewed to ascertain current and historic environmental concerns on the Property. Ms. Broadfoot stated that her father had acquired the Property in 1969. She indicated that the Property may have already been recently developed with the existing brick buildings on the Property, but that prior to the development of the mobile home park, the land had been used for agricultural purposes or maintained as pastureland. Ms. Broadfoot was not aware of any historic environmental conditions being present on the Property prior to her family's ownership.

Ms. Broadfoot indicated that the remaining buildings on the Property had likely been constructed in the 1960s, and that during her family's ownership, she was unaware of any asbestos-containing materials or lead-based paint surveys being conducted on the Property. The mobile homes on the Property were originally predominantly owned by Royal Park Rentals LLC, the family entity that owned and rented the mobile homes. She indicated that the mobile homes were an array of ages, ranging from the 1970s to the 1990s. She stated that the mobile homes were individually serviced by hookups to City water, City sewer, and electrical infrastructure. She also indicated that many of the mobile homes were sold or replaced by the park's tenants.

Ms. Broadfoot stated that Royal Park was sold to another entity in the 1980s, but that the property was re-purchased by her family in the mid-1990s. She was unaware of any RECs being present on the Property at the time of the family's purchase of the Property in the mid-1990s, and she stated that Royal Park had been maintained as a mobile home park during the previous owner's tenure of ownership.

Ms. Broadfoot indicated that the building located at 701 SW 17<sup>th</sup> Street functioned as an office and a small garage onsite housed power tools and other small maintenance equipment. She stated that, to her knowledge, no regulated chemicals were stored on the Property during the family's ownership, with the exception of a construction staging area being located at near SW 14<sup>th</sup> Street and Yule Drive. She indicated that an AST containing fuel was located in the staging area, and that she was unaware of any leaks or spills related to the construction staging area. She was also unaware of any tenants of the mobile home park doing auto repair or any other type of work that would utilize regulated chemicals or petroleum hydrocarbons.

Ms. Broadfoot stated that 21 mobile homes were damaged from the May 20, 2013 tornado, and that the damaged homes had to be hauled off of the Property. She also indicated that the cleanup of the debris on the Property took several months and involved over 750 volunteers. She was not aware of any leaks or spills of regulated chemicals or petroleum hydrocarbons on the Property resulting from the tornado. Ms. Broadfoot stated that the remaining tenants on the Property were instructed to leave by June 1, 2014, and that the remaining mobile homes were removed from the Property at that time. She indicated that the Property has remained vacant from June 1, 2014 to the present.

## 8.0 Findings

We have performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527-13. The Property consists of approximately 14.44 acres located within the southeast quarter of Section 22, Township 10 North, Range 3 West of Cleveland County.

### 8.1 Subject Property

Historical sources indicate the Property was initially developed as a mobile home park in the late 1960s. Development of the mobile home park continued until the early 1970s. The mobile home park remained in operation until 2014, when it was vacated due to tornado damage. To date, the Property is predominantly vacant, with mobile home pad infrastructure in place and three buildings remaining of the Property.

### 8.2 Adjoining Properties

The Property is located in an area that served as rural agricultural land from at least the early 1950s through the 1960s. In the 1960s, land to the east and south of the Property began to be developed for residential purposes. This development continued throughout the 1970s, and by the 1980s, all adjoining properties were comprised of residential structures except the land to the southwest of the Property. Commercial buildings were constructed south and southeast of the Property, along SW 19<sup>th</sup> Street and Telephone Road, in the 1990s and 2000s. In May 2013, an EF-5 tornado caused severe damage or destroyed homes to the west, north, and northeast of the Property. The homes to the west of the Property were cleared in 2014; homes to the north and northeast were rebuilt as residential structures. At the time of this report, land to the west and southwest was under construction as an apartment complex and a commercial building.

## 9.0 Opinion

Regulatory review of Federal, State, and local environmental databases did not produce information of any sites located on or adjacent to the Property that would pose an environmental concern to the Property. However, on May 20, 2013, a tornado destroyed mobile homes on the Property, as well as homes to the neighborhoods southwest, west, and north of the Property, causing debris to be scattered for miles. Debris was evident on the Property in an aerial photograph dated May 21, 2013. Additionally, debris remains on the Property after tenants vacated the mobile home park in 2014.

Royal Park and adjoining neighborhoods were constructed in the 1960s and 1970s. During this time, the use of asbestos-containing materials and lead-based paint was common. When debris from the adjoining neighborhoods was scattered throughout the Property during the tornado, and when the mobile home park was cleared in 2014, remnants of asbestos-containing materials and lead-based paint may have been deposited on the surface layer of soil on the Property. In the event that the existing surface soil remains exposed in future redevelopment plans, it is recommended that shallow surface samples be obtained and analyzed for asbestos-containing materials and lead-based paint.

Additionally, no inquiry was made in this report with respect to asbestos-containing materials within the three remaining buildings remaining on the Property. In the event that these structures are demolished, it is recommended that an asbestos-containing materials survey be conducted by a licensed contractor prior to demolition.

## 10.0 Conclusions

Lochner has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E 1527-13 of a property comprised of a single legal description within the southeast quarter of Section 22, Township 10 North, Range 3 West of Cleveland County, referred to in this report as the Property. Any exceptions to, or deletions from, this practice are described in Section 11.0 of this report. This assessment has indicated that a potential REC exists on the Property in that the May 2013 tornado potentially scattered asbestos-containing materials and lead-based paint debris throughout the Property. Soil sampling is recommended on the Property prior to redevelopment to assess the potential of asbestos-containing materials or lead-based paint in surface soils.

Additionally, based upon the reported construction date of the remaining buildings, and the prevalence of asbestos within building materials of these time periods, the structure may contain at least limited quantities of asbestos-containing materials. Therefore, an asbestos-containing materials survey is recommended for the remaining buildings prior to renovation or demolition.

**11.0 Deviations**

Except for the limitations and exceptions discussed in Section 2.4, this Phase I ESA complies with the ASTM Standard 1527-13.

**12.0 Additional Services**

No additional services were provided as part of the Phase I ESA.

**14.0 Signatures of Environmental Professionals**

In accordance with ASTM Standard E1527-13 and the USEPA Standards and Practices for All Appropriate Inquiries; Final Rule; this ESA was completed by an environmental professional with relevant experience pursuant to 40 CFR 10. An environmental professional is defined as a person who possesses sufficient specific education, training, and experience necessary to exercise professional judgment to develop opinions and conclusions regarding conditions indicative of releases or threatened releases. Relevant experience is defined as participation in the performance of all appropriate inquiries investigations, environmental site assessments, or other site investigations that may include environmental analyses, investigations, and remediation which involve the understanding of surface and subsurface environmental conditions and the processes used to evaluate these conditions and for which professional judgment was used to develop opinions regarding conditions indicative of releases or threatened releases to the subject property.

Any person who does not qualify as an environmental professional under the above mentioned definition may assist in the conduct of all appropriate inquiries with this part if such person is under the supervision or responsible charge of a person meeting the definition of an environmental professional provided above when conducting such activities.

"I, Sadie Robb, declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental professional as defined in § 312.10 of 40 CFR 312 and I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312."

Memberships:

American Planning  
Association

Ms. Robb serves Lochner as an Environmental Planner for the Environmental Science & Solutions team. Her primary responsibilities include management of NEPA studies, natural resource studies, environmental constraints analyses, and environmental site assessments. She is experienced in stream assessments, technical writing, and NEPA documentation associated with transportation and site development projects. Since 2008, Ms. Robb has had comprehensive experience working within numerous federal and state regulatory programs including NEPA, Section 106 Consultation and CWA - Section 404.

In addition, she is experienced in various facets of transportation planning. During her coursework at the University of Kansas, she completed a travel demand model for the City of DeSoto, Kansas to assess future transportation network needs, presenting the results to the city engineer. She has also modeled a Shawnee, Kansas intersection using various types of traffic control methods and prepared the findings for a joint presentation at the 2008 Mid-Continent Transportation Symposium in Madison, Wisconsin.

Prior to joining Lochner, Ms. Robb worked as Assistant Planner for the City of Basehor, Kansas. Her responsibilities with the City of Basehor included drafting staff reports on development proposals for the planning commission, advising the city council on planning-related issues, and redrafting and enforcing zoning ordinances. In addition, she served as Student Commissioner on the Lawrence-Douglas County Planning Commission where she assessed planning proposals in the Lawrence metropolitan area, queried developers and the public, and voted on each agenda item.

## EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

### TARGET PROPERTY INFORMATION

#### ADDRESS

1719 S JANEWAY AVE  
CLEVELAND County, OK 73160

#### COORDINATES

Latitude (North): 35.3240000 - 35° 19' 26.40"  
Longitude (West): 97.4988000 - 97° 29' 55.68"  
Universal Transverse Mercator: Zone 14  
UTM X (Meters): 636453.2  
UTM Y (Meters): 3909809.5  
Elevation: 1209 ft. above sea level

### USGS TOPOGRAPHIC MAP ASSOCIATED WITH TARGET PROPERTY

Target Property Map: 35097-C4 MOORE, OK  
Most Recent Revision: 1995  
  
West Map: 35097-C5 OKLAHOMA CITY SE, OK  
Most Recent Revision: 1986

### TARGET PROPERTY SEARCH RESULTS

The target property was not listed in any of the databases searched by EDR.

### DATABASES WITH NO MAPPED SITES

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records either on the target property or within the search radius around the target property for the following databases:

### SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

## EXECUTIVE SUMMARY

### STANDARD ENVIRONMENTAL RECORDS

#### ***Federal RCRA generators list***

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 06/10/2014 has revealed that there is 1 RCRA-LQG site within approximately 0.375 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
TARGET STORE #T2727	720 SW 19TH ST	S 1/8 - 1/4 (0.234 mi.)	6	10

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/10/2014 has revealed that there are 2 RCRA-SQG sites within approximately 0.375 miles of the target property.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 06/10/2014 has revealed that there is 1 RCRA-CESQG site within approximately 0.375 miles of the target property.

## EXECUTIVE SUMMARY

### ***State and tribal leaking storage tank lists***

LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the Oklahoma Corporation Commission's Leaking UST list.

A review of the LUST list, as provided by EDR, and dated 10/07/2014 has revealed that there are 4 LUST sites within approximately 0.625 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

### ***State and tribal registered storage tank lists***

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Oklahoma Corporation Commission's State UST List, List II Version.

A review of the UST list, as provided by EDR, and dated 05/30/2014 has revealed that there are 2 UST sites within approximately 0.375 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

## EXECUTIVE SUMMARY

### ADDITIONAL ENVIRONMENTAL RECORDS

#### ***Local Lists of Registered Storage Tanks***

HIST UST: This underground storage tank listing includes tank information through March 2003. This listing is no longer updated by the Oklahoma Corporation Commission.

A review of the HIST UST list, as provided by EDR, and dated 03/21/2003 has revealed that there are 2 HIST UST sites within approximately 0.375 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

#### ***Other Ascertainable Records***

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/10/2014 has revealed that there is 1 RCRA NonGen / NLR site within approximately 0.375 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
HOME DEPOT TRC3917	650 SW 19TH ST	SSE 1/8 - 1/4 (0.245 mi.)	B8	16

### EDR HIGH RISK HISTORICAL RECORDS

#### ***EDR Exclusive Records***

EDR US Hist Auto Stat: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Auto Stat list, as provided by EDR, has revealed that there are 3 EDR US Hist Auto Stat sites within approximately 0.375 miles of the target property.

## EXECUTIVE SUMMARY

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
Not reported	1717 S TELEPHONE RD	ESE 0 - 1/8 (0.116 mi.)	A3	7
Not reported	1817 S TELEPHONE RD	SE 1/8 - 1/4 (0.179 mi.)	A5	9
Not reported	510 SW 19TH ST	SE 1/4 - 1/2 (0.294 mi.)	C12	22

EDR US Hist Cleaners: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR US Hist Cleaners list, as provided by EDR, has revealed that there are 3 EDR US Hist Cleaners sites within approximately 0.375 miles of the target property.

Hazardous Waste Summary:

Waste code: D001  
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002  
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D005  
Waste name: BARIUM

Waste code: D008

Hazardous Waste Summary:

Waste code: D001  
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002  
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D003  
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

## STANDARD ENVIRONMENTAL RECORDS

### ***Federal NPL site list***

#### **NPL: National Priority List**

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 09/29/2014	Source: EPA
Date Data Arrived at EDR: 10/08/2014	Telephone: N/A
Date Made Active in Reports: 11/17/2014	Last EDR Contact: 10/08/2014
Number of Days to Update: 40	Next Scheduled EDR Contact: 01/19/2015
	Data Release Frequency: Quarterly

#### **Proposed NPL: Proposed National Priority List Sites**

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 09/29/2014	Source: EPA
Date Data Arrived at EDR: 10/08/2014	Telephone: N/A
Date Made Active in Reports: 11/17/2014	Last EDR Contact: 10/08/2014
Number of Days to Update: 40	Next Scheduled EDR Contact: 01/19/2015
	Data Release Frequency: Quarterly

#### **NPL LIENS: Federal Superfund Liens**

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## ***Federal Delisted NPL site list***

### DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 09/29/2014	Source: EPA
Date Data Arrived at EDR: 10/08/2014	Telephone: N/A
Date Made Active in Reports: 11/17/2014	Last EDR Contact: 10/08/2014
Number of Days to Update: 40	Next Scheduled EDR Contact: 01/19/2015
	Data Release Frequency: Quarterly

## ***Federal CERCLIS list***

### CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 10/25/2013	Source: EPA
Date Data Arrived at EDR: 11/11/2013	Telephone: 703-412-9810
Date Made Active in Reports: 02/13/2014	Last EDR Contact: 11/24/2014
Number of Days to Update: 94	Next Scheduled EDR Contact: 03/09/2015
	Data Release Frequency: Quarterly

### FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 07/21/2014	Source: Environmental Protection Agency
Date Data Arrived at EDR: 10/07/2014	Telephone: 703-603-8704
Date Made Active in Reports: 10/20/2014	Last EDR Contact: 10/07/2014
Number of Days to Update: 13	Next Scheduled EDR Contact: 01/19/2015
	Data Release Frequency: Varies

## ***Federal CERCLIS NFRAP site List***

### CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 10/25/2013	Source: EPA
Date Data Arrived at EDR: 11/11/2013	Telephone: 703-412-9810
Date Made Active in Reports: 02/13/2014	Last EDR Contact: 11/24/2014

## ***Federal RCRA non-CORRACTS TSD facilities list***

### **RCRA-TSDF: RCRA - Treatment, Storage and Disposal**

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 06/10/2014

Data Release Frequency: Quarterly

## ***Federal RCRA generators list***

### **RCRA-LQG: RCRA - Large Quantity Generators**

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 06/10/2014  
Date Data Arrived at EDR: 07/02/2014  
Date Made Active in Reports: 09/18/2014  
Number of Days to Update: 78

Telephone: 214-665-6444  
Last EDR Contact: 11/07/2014  
Next Scheduled EDR Contact: 01/12/2015  
Data Release Frequency: Quarterly

### **RCRA-SQG: RCRA - Small Quantity Generators**

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 06/10/2014  
Date Data Arrived at EDR: 07/02/2014  
Date Made Active in Reports: 09/18/2014  
Number of Days to Update: 78

Data Release Frequency: Quarterly

### **RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators**

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 06/10/2014  
Date Data Arrived at EDR: 07/02/2014  
Date Made Active in Reports: 09/18/2014

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## ***Federal institutional controls / engineering controls registries***

### **US ENG CONTROLS: Engineering Controls Sites List**

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 09/18/2014	Source: Environmental Protection Agency
Date Data Arrived at EDR: 09/19/2014	Telephone: 703-603-0695
Date Made Active in Reports: 10/20/2014	Last EDR Contact: 09/08/2014
Number of Days to Update: 31	Next Scheduled EDR Contact: 12/22/2014
	Data Release Frequency: Varies

### **US INST CONTROL: Sites with Institutional Controls**

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 09/18/2014	Source: Environmental Protection Agency
Date Data Arrived at EDR: 09/19/2014	Telephone: 703-603-0695

	Data Release Frequency: Annually

## ***State- and tribal - equivalent CERCLIS***

### **SHWS: Voluntary Cleanup & Superfund Site Status Report**

Land restoration projects carried out in several DEQ programs.

Date of Government Version: 12/31/2009	Source: Department of Environmental Quality
Date Data Arrived at EDR: 05/28/2010	Telephone: 405-702-5100
Date Made Active in Reports: 07/13/2010	Last EDR Contact: 11/18/2014
Number of Days to Update: 46	Next Scheduled EDR Contact: 03/02/2015
	Data Release Frequency: Varies

## ***State and tribal landfill and/or solid waste disposal site lists***

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## SWF/LF: Permitted Solid Waste Disposal & Processing Facilities

Solid Waste Facilities/Landfill Sites. SWF/LF type records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. Depending on the state, these may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites.

Date of Government Version: 03/18/2013  
Date Data Arrived at EDR: 11/08/2013  
Date Made Active in Reports: 12/27/2013  
Number of Days to Update: 49

Source: Department of Environmental Quality

## State and tribal Brownfields sites

### BROWNFIELDS: Brownfield Sites

Brownfields are defined by Oklahoma law as abandoned, idled or under used industrial or commercial facilities or other real property at which expansion or redevelopment of the real property is complicated by environmental contamination caused by regulated substances. This program provides a means for private parties and government entities to voluntarily investigate and if warranted, clean up properties that may be contaminated with hazardous wastes. The formal Brownfields Program provides specific state liability relief and protects the property from federal Superfund actions.

Date of Government Version: 09/07/2012  
Date Data Arrived at EDR: 09/07/2012  
Date Made Active in Reports: 10/10/2012

## ADDITIONAL ENVIRONMENTAL RECORDS

### Local Brownfield lists

#### US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

## **Other Ascertainable Records**

RCRA NonGen / NLR: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

## UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

### FTTS INSP: FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act)

A listing of FIFRA/TSCA Tracking System (FTTS) inspections and enforcements.

Date of Government Version: 04/09/2009  
Date Data Arrived at EDR: 04/16/2009  
Date Made Active in Reports: 05/11/2009  
Number of Days to Update: 25

Source: EPA  
Telephone: 202-566-1667  
Last EDR Contact: 11/19/2014  
Next Scheduled EDR Contact: 03/09/2015  
Data Release Frequency: Quarterly

### HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

## HIST FTTS INSP: FIFRA/TSCA Tracking System Inspection & Enforcement Case Listing

A complete inspection and enforcement case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Data Release Frequency: No Update Planned

## SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

Number of Days to Update: 40	Next Scheduled EDR Contact: 12/22/2014
	Data Release Frequency: Quarterly

## RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995	Source: EPA
Date Data Arrived at EDR: 07/03/1995	Telephone: 202-564-4104

Number of Days to Update: 35	Next Scheduled EDR Contact: 09/01/2008
	Data Release Frequency: No Update Planned

## RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

Date of Government Version: 08/01/2014	Source: Environmental Protection Agency
Date Data Arrived at EDR: 08/12/2014	Telephone: 202-564-8600

## 2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

## EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

## US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

## EDR HIGH RISK HISTORICAL RECORDS

### ***EDR Exclusive Records***

#### EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

#### EDR US Hist Auto Stat: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

## OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

## CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 07/30/2013  
Date Data Arrived at EDR: 08/19/2013  
Date Made Active in Reports: 10/03/2013  
Number of Days to Update: 45

Source: Department of Energy & Environmental Protection  
Telephone: 860-424-3375  
Last EDR Contact: 11/17/2014  
Next Scheduled EDR Contact: 03/02/2015  
Data Release Frequency: No Update Planned

## NY MANIFEST: Facility and Manifest Data

Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a TSD facility.

Date of Government Version: 11/01/2014  
Date Data Arrived at EDR: 11/05/2014  
Date Made Active in Reports: 11/24/2014  
Number of Days to Update: 19

Source: Department of Environmental Conservation  
Telephone: 518-402-8651  
Last EDR Contact: 11/05/2014  
Next Scheduled EDR Contact: 02/16/2015  
Data Release Frequency: Annually

## WI MANIFEST: Manifest Information

Hazardous waste manifest information.

Date of Government Version: 12/31/2013  
Date Data Arrived at EDR: 06/20/2014  
Date Made Active in Reports: 08/07/2014  
Number of Days to Update: 48

Source: Department of Natural Resources  
Telephone: N/A  
Last EDR Contact: 09/15/2014  
Next Scheduled EDR Contact: 12/29/2014  
Data Release Frequency: Annually

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

### AHA Hospitals:

Source: American Hospital Association, Inc.  
Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

### Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services  
Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

### Nursing Homes

Source: National Institutes of Health  
Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

### Public Schools

Source: National Center for Education Statistics  
Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

### Private Schools

Source: National Center for Education Statistics  
Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

# GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Daycare Centers: Day Care Centers  
Source: Department of Human Services  
Telephone: 405-521-3561

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

## TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General NE

## SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## **HYDROLOGIC INFORMATION**

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

## **FEMA FLOOD ZONE**

<u>Target Property County</u> CLEVELAND, OK	<u>FEMA Flood Electronic Data</u> YES - refer to the Overview Map and Detail Map
Flood Plain Panel at Target Property:	40027C - FEMA DFIRM Flood data
Additional Panels in search area:	Not Reported

## **NATIONAL WETLAND INVENTORY**

<u>NWI Quad at Target Property</u> MOORE	<u>NWI Electronic Data Coverage</u> YES - refer to the Overview Map and Detail Map
---	---

## **HYDROGEOLOGIC INFORMATION**

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

## **AQUIFLOW®**

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

### GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

### GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

# GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

### Soil Map ID: 1

Soil Component Name: Renfrow

Soil Surface Texture: silt loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class:  
Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: High

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	7 inches	silt loam	Not reported	Not reported	Max: 14.114 Min: 4.233	Max: 7.8 Min: 6.1
2	7 inches	11 inches	silty clay loam	Not reported	Not reported	Max: 4.233 Min: 1.4114	Max: 7.8 Min: 6.1
3	51 inches	61 inches	silty clay	Not reported	Not reported	Max: 0.4233 Min: 0.0106	Max: 8.4 Min: 6.1
4	61 inches	83 inches	bedrock	Not reported	Not reported	Max: 0.4233 Min: 0	Max: Min:
5	11 inches	51 inches	silty clay	Not reported	Not reported	Max: 0.4233 Min: 0.0106	Max: 8.4 Min: 6.1

### Soil Map ID: 2

Soil Component Name: Urban land

Soil Surface Texture: variable

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class:

## GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

## TOPOGRAPHIC INFORMATION

### USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

### Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

## HYDROLOGIC INFORMATION

**Flood Zone Data:** This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

**NWI:** National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

## HYDROGEOLOGIC INFORMATION

### AQUIFLOW<sup>R</sup> Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

## GEOLOGIC INFORMATION

### Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

### STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

### SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

# PHYSICAL SETTING SOURCE RECORDS SEARCHED

## LOCAL / REGIONAL WATER AGENCY RECORDS

### FEDERAL WATER WELLS

#### PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

#### PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

#### USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

### STATE RECORDS

#### Reported Well Locations in Oklahoma

Source: Oklahoma Water Resources Board

Telephone: 405-530-8800

## OTHER STATE DATABASE INFORMATION

#### Oil and Gas Well Listing

Source: Oklahoma Corporation Commission

Telephone: 405-521-3636

Oil and gas well locations in the state.

#### Oil and Gas Well Listing

Source: Osage Nation Environmental and Natural Resources

Telephone: 918-287-5333

Oil and gas well locations.

### RADON

#### State Database: OK Radon

Source: Department of Environmental Quality

Telephone: 405-702-5100

Radon Information

#### Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

#### EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

# EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

**When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.**

***Thank you for your business.***
